

BITRIPAY E- wallet QR code payment in DRC (and SS Africa)

FINTECH

JNN Group

Needs

DR Congo, where we will start our operation has 110 million people where but only 7% of the Congolese population has a bank account.

2.5 billion people across Africa, only 20 percent of families have formal bank accounts.

Solution

E-wallet payment system operating in the D R Congo using a QR code based on both Google's Android and Apple's iOS operating systems that can be used online and offline (SMS), and customers can register from their smartphones or a web portal using both Microsoft and Apple operating systems.

E-Wallet

Customers can link their account with both or either mobile money or online banking. Then they can download a QR code that allows them to pay or receive payment from another QR code. The app will need a pin code to enable access to pay or receive and put the amount they need to be paid and can receive the same amount many times from many customers (e.g. in public transport).

Financial Inclusion

Our project is a sound, inclusive, and sustainable financial market essential to building shared prosperity and eradicating poverty. Yet, as many as 2.5 billion adults in Africa lack access to financial services such as payments credit and savings accounts. Although the small-scale business sector is the engine of growth in many economies, it is estimated that over 200 million micro, small and medium enterprises cannot access the credit necessary to grow and prosper.

FinTech

FinTech to resolve Sub-Saharan Africa, financial inclusion has increased rapidly in recent years due mainly to the development of digital financial services and innovative business models such as agent banking. More than 20 percent of adults had a bank account in 2020, up from 24 percent in 2011. While just 2% of adults worldwide have a mobile account, 12% in Sub-Saharan Africa have one.

Investment

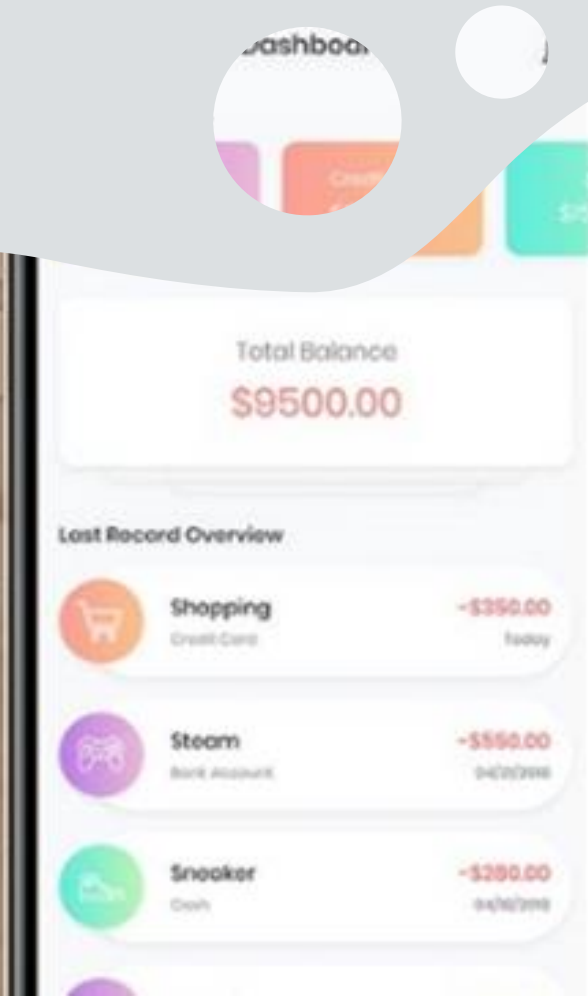

JNN Group will invest 100 % in the production, hosting and maintenance of the Apps.

Needs investment to fund other parts of the projects (Licences, Marketing, deployment and operation, and others)
